**Piloting of PredicAire in Residential Care Homes in Caerphilly,
Blaenau Gwent and Monmouthshire**

PredicAire Live Demonstration

December 2024

Piloting of PredicAire in residential care homes in Caerphilly, Blaenau Gwent and Monmouthshire

Setting the strategic direction:

- The national digital strategy for social care emphasises the importance of leveraging technology to enhance the quality and efficiency of care services.
- This involves integrating digital solutions into the social care system to improve service delivery, support care providers, and empower those receiving care.
- This project is integral to this national vision, implementing technologies such as AI to streamline operations, improve decision-making, and deliver personalised care.
- The Social Care Engine Room oversees the progress and implementation of digital and AI projects within the social care sector, ensuring alignment with broader goals and adjacent projects to enhance care outcomes.
- The Digital Advisory Group (DAG) supports this by providing expert guidance and strategic direction, making sure that projects are technically sound and well-integrated into existing infrastructure.

Piloting of PredicAire in residential care homes in Caerphilly, Blaenau Gwent and Monmouthshire

Scope of the Project

To pilot a digital system, with **AI functionality**, that has the potential to support the delivery of local authority run residential care services in Wales.

This project will involve trialling the implementation and testing of a digital system to move the management of the provision from paper-based processes to digital delivery

From the implementation of this project, we will work with you to evaluate the benefits of using PredicAire, the challenges and any lessons learnt during the pilot implementation.
